

L&M Imaging to Support Expo LD Direct to Screen Machines

20th September 2017

L&M Imaging Systems react to lack of support for Expo LD

Hebden Bridge, West Yorkshire – September 20th, 2017 – L&M Imaging Systems announced support for all affected customers.

Since Assoprint SRS SPA, Modena, Italy closed for business all end users have been very concerned regarding ongoing support for their EXPO LD machines. During the selling process most customers were made aware that key components were supplied by Lüscher Technologies AG, Bleienbach, Switzerland. However, since many components were sourced from other suppliers, and the system was not manufactured by Lüscher Technologies AG, they are unable to offer support on these machines.

L&M Imaging Systems Ltd, Hebden Bridge, UK have worked as service partners to Lüscher for almost 20 years with our technicians having in depth knowledge and experience installing, training, servicing and repairing all revisions of their direct to screen machines.

With immediate effect L&M Imaging Systems Ltd will be available to support all Expo LD end users and will have the exclusive support of Lüscher Technologies AG for all optical, interface and software components originally supplied by them. All approaches to Lüscher Technologies AG for support on EXPO LD machines will now be redirected to L&M Imaging Systems Ltd.

About L&M Imaging Systems

L&M Imaging Systems Ltd. is leading supplier of imaging technologies, service and supplies for graphic and industrial applications. L&M Imaging can trace its history back more than 125 years to the Linotype & Machinery Company based in Altrincham, Cheshire. The Imaging Systems division became an independent limited company in 1991.

For over 25 years L&M Imaging have successfully applied a broad range of optical, imaging, laser, and digital-electronic technologies to meet the business needs of its customers. L&M Imaging is dedicated to maintaining the highest standards of service and support to its UK and international customers.

L&M Imaging Systems --- A wealth of imaging experience.
