

The HEIGHTS SU Short Stackers are manufactured to the highest possible standards of quality and durability. Units are built to withstand 'unlimited plate throughput' in multiple shift applications.

They are supplied with a detachable trolley so that plates can be transported to the pressroom in safety.

The SU Short Stackers are manufactured in two sizes (850mm wide and 1250mm wide) and are designed in 'short' mode, which is most suited to landscape plate production.
